PROJECTS

Puzzle Forge AI Game | Apr 2026 – Present

Tools / techniques used: Java, Data Structures & Algorithms

Details / Objective: Developed a Java-based puzzle-solving application; implemented BFS, Dijkstra's Algorithm, Greedy Algorithms, and Dynamic Programming to optimize solution paths.

Amazon Cart – Full-Stack E-Commerce Application | Jun 2026 – Present

Tools / techniques used: Node.js, Express.js, MySQL, JWT, Axios

Details / Objective: Developed an Amazon-style full-stack e-commerce application and implemented JWT-based authentication and backend APIs for application data management.

Train Ticket Booking System | Nov 2024 – Present

Tools / techniques used: Python, JSON, CSV

Details / Objective: Developed a Python-based railway reservation system using JSON and CSV for persistent data storage.

ACHIEVEMENTS

- 100+ Days LeetCode Challenge | 2026 — Maintained a 100+ day daily coding streak, strengthening problem-solving and Data Structures & Algorithms skills.
